Terrace SunDeck 2020

25

25-year guarantee

We guarantee 25 years of resistance to wood decay, wood-destroying fungi and insects.

Additional safety

The SunDeck terrace deck has a non-slip surface and does not splinter.

Easy to clean

Sun-Deck terrace deck is neither painted nor oiled or coated.

Leno

The natural wood look

P. 5

The Leno terrace deck from SunDeck combines the advantages of plastic with the aesthetics of wood.

Leno Plus

The rough wood look

P. 7

Achieve an even more realistic wood look with an additional paint layer.

Rib

The best performer in the wet

P. 11

This robust, no warping terrace deck is characterised by deep, straight grooves, which come to the fore in wet conditions.

Sand Plus

Simple elegance

P. 13

The SunDeck terrace deck Sand Plus perfectly embodies the elegance of a smoothly sanded wooden plank.

Rustic Top

The original wood character

P. 15

Back to nature. With its solid structure and grooves of different widths, Rustic Top really gives off the character of original wooden floors.

A terrace is life

Natural look, ecological sensibility

Our SunDeck terrace decks are ideal for outdoor use. Ideal means that they are environmentally friendly and extremely easy to maintain. The natural look of the planks turns every outside surface into a living space that makes you feel good. Our decking planks are an ecologically sound alternative to tropical hardwoods.

Durable and environmentally friendly

Our WPC (wood-plastic-composite) is an ecological composite material made of wood and environmentally friendly polymer, consisting of 60 percent wood mass and 40 percent HDPE (high-density polyethylene). The wood for our decking planks is an environmentally friendly alternative to hardwoods sourced from the tropics.

It comes from PEFC-certified, sustainably managed forests. The WPC products on offer have a long lifespan, and even at the end of their useful life, the decking can still be fully recycled

As beautiful as wood, only more practical than wood

The SunDeck terrace deck made of wood and plastic is durable and easy to maintain, just like plastic. The material is resistant to UV radiation. In contrast to wood, it does not splinter and does not have to be painted or oiled. In addition to durability, SunDeck terrace deck stands out with its aesthetics and natural appearance. Another advantage over wooden planks is its non-slip surface, even when wet. And its also easy to lay than with pure wooden floorboards, since there is practically no length expansion.

Our programme is built around diversity

We offer five product families with a variety of colours and surfaces. Due to the full profile, all SunDeck planks are characterised by their high durability.

The guaranteed sunny sides

SunDeck terrace deck is weatherproof and resistant to the effects of cold, heat, acid rain, salt and chlorine water, wood-destroying fungi and insects. It has a high resistance to UV radiation and is colour-fast for a long time. Our SunDeck terrace deck does not splinter and features a non-slip surface.

Leno

Raised in structure, as fine as brushed wood

Raised in structure - as fine as brushed wood

cedar

teak

palisander

wenge

inox

eben

Advantages that inspire

- Natural wood look
- Weatherproof
- Strong, long lifespan
- Non-slip surface
- Shatter-proof
- Almost maintenance-free, simply rinse off with water
- 100% recyclable
- Guarantee up to 25 years

The Leno terrace deck from the SunDeck series combines the advantages of plastic with the aesthetics of wood. The surface structure also feels pleasant to bare feet and its non-slip properties increase safety when wet.

Leno 14

Leno is 137 mm wide, Material thickness 22 mm. Standard lengths 4 m, 5 m und 6 m, Spezial lengths 2-6 m.

Leno 19

Leno XL is the wider variant with 195 mm, the material thickness 22 mm. Standard length 4 m, special lengths 2-4 m.

Leno Plus

The plus in wood

Advantages that impress

- Optimal wood look thanks to subtle black tint
- Weatherproof
- Strong, long lifespan
- Non-slip surface
- Shatter-proof
- Almost maintenance-free, simply rinse off with water
- 100% recyclable
- Guarantee up to 25 years

The Leno Plus terrace board has a similar structure to the Leno board. The main difference is that the surface features an additional colour (subtle black tint). This additional colour makes the terrace surface look even more realistic. Also, dirt from pollen and other common contaminants is less noticeable due to the different gradation of the colours. Short: The SunDeck terrace deck Leno Plus is as strong as Leno, but its appearance makes it a little less sensitive in everyday life.

Leno Plus 14

Leno Plus is 137 mm wide and 22 mm thick.
Standard lengths 4 m, 5 m and 6 m,
special lengths 2-6 m.

A terrace
is relaxation

Advantages that convince

- The deep grooves on the surface increase safety when wet
- High resistance to salty and chlorinated water
- High weather resistance (sun, rain, frost, snow)
- High resistance to contact damage
- Non-warp and strong
- Shatter-proof
- Almost maintenance-free, simply rinse off with water
- 100% recyclable
- Guarantee up to 25 years

This strong, non-warping decking is characterised by deep, linear grooves. Rib is particularly recommended for wet conditions, for example around swimming pools. Because the depth of the grooves ensures a firm footing even in the wet and prevents slipping. Rib is available in four colours.

Rib 14

Rib Standard is 137 mm wide and 22 mm thick. Standard lengths 4 m, 5 m and 6 m, special lengths 2-6 m.

Rib 19

Rib XL is the wider variant with 195 mm, the material thickness is 23 mm. Standard length 4 m, special lengths 2-4 m.

All colours / decor shown in the brochure may differ from the original tones due to printing. We are happy to provide you with original samples.

Sand Plus

Simple elegance

Appearance of smooth sanded wooden.

Advantages that are visible

- Simple elegance
- High resistance to salty and chlorinated water
- High weather resistance (sun, rain, frost, snow)
- High resistance to contact damage
- Non-warp and strong
- Shatter-proof
- Almost maintenance-free, simply rinse off with water
- 100% recyclable
- Guarantee up to 25 years

The SunDeck terrace deck Sand Plus perfectly embodies the elegance of a smoothly sanded wooden plank. Sand Plus achieves the amazing effect with an irregular pigmentation of the colour (light, black tint). The planks come very close to a natural look.

Sand Plus 14

Sand Plus Standard is 137 mm wide and 23 mm thick.
Standard length 4 m,
Special lengths 2-6 m.

Rustic Top

The gap-free solution

Advantages with endurance

- Board design in the look of old wooden floors
- Overlapping profile that hides the gaps between the planks
- High weather resistance (sun, rain, frost, snow)
- High resistance to contact damage
- Non-warp and strong
- Shatter-proof
- Almost maintenance-free, simply rinse off with water
- 100% recyclable
- Guarantee up to 25 years

Back to nature. With its solid structure and grooves of different widths that overlap each other, Rustic Top really gives off the character of original wooden floors. This structure gives the surface a look of a classic, rustic wooden terrace. The planks overlap so that dirt does not get lodged in the gaps, ensuring the terrace looks clean at all times.

Rustic Top 14

Rustic Top Standard is 140 mm wide and 22 mm thick.
 Standard lengths 4 m, 5 m and 6 m,
 special lengths 2–6 m.

inspiration

A terrace
is fun

Easy assembly

WERZALIT supplies everything needed to manufacture excellent substructure characteristics and assemble the deck planks. The SunDeck fastening system contains all fixtures required for assembly. It is so well thought out that it reduces the usual assembly time for decking by 50%.

- The substructure supports are made of WPC or aluminium, the clip system is simply screwed to the supports
- End strips to cover the supporting structure are available to match the colours of the decking
- Shims for height differences are also available

End strips for the sides of the SunDeck terrace.
The same material as the SunDeck terrace boards
90 x 15 x 2000 mm - Leno / Sand Plus on both sides

Approximate material consumption per square meter of terrace floor

Profiles 137 mm wide

Decking	7,25 pcs./m ²
