At a glance

Technology that lasts

Two systems tested and proven for decades have been reunited in REFINE. This endless experience creates trust and guarantees the longevity of selekta.

Fast & flexible

WERZALIT façade profiles are easy to process and can be installed on well-known substructure systems. This saves valuable time and money. REFINE is ideally suited for combination with other façade systems.

Protection & Environment

selekta REFINE protects your building sustainably. Both the builder and our environment benefit from the long service life and almost maintenance-free surface.

Sustainability

selekta REFINE consists exclusively of renewable materials.

Timelessly unique

Our decors are timeless and gives your building an incomparable aesthetics. In addition to the standard colors, almost all RAL colors are available on request.

Maximum UV and weather resistance

With innovative materials, WERZALIT offers consistently beautiful façades that are characterized by low maintenance requirements.

selekta REFINE combines both, a for decades tested and proven system from HPL production and a newly developed production process.

This combination enables façade designs with the best UV protection and durability.

Design variety and economical assembly

selekta REFINE facade profiles offer almost unlimited design possibilities. They can be laid vertically, horizontally and diagonally. Furthermore, they can be excellently combined with other facade systems.

WERZALIT facade cladding is also easy to process. With a high degree of prefabrication, sophisticated mounting systems, large mounting distances and a comprehensive range of accessories, WERZALIT facade profiles allow for high cost-effectiveness during installation.

The REFINE advantages

- extremely weather-resistant and UV-stable
- low-maintenance – no repainting
- Fast, economical assembly
- 10-year guarantee
- PEFC certified and 100% recyclable
- Made in Germany

The WERZALIT climate-façade

As a curtain-wall facing and ventilated façade, selekta REFINE protects the building over the long term. This keeps the façade dry, which guarantees a long service life. This for centuries tested and proven system is also unsurpassed in the field of climate protection.
